Monte Carlo 156, 246, 1291
Multicenter clinical trials 182
Multiple comparisons 1300
Multiple imputation 711, 978
Multiple recapture 1241
Multiplicative model 1120
Multistage model 1228
Multitype point patterns 1051
Multivariate adaptive regression splines 1071
Multivariate categorical data 839
Multivariate diffusion 317
Multivariate elliptically contoured distribution 1277
Multivariate failure time data 1078
Multivariate failure time model 1228
Multivariate failure time 1108
Multivariate failure times 182, 805
Multivariate growth curve model 957
Multivariate logistic models 85
Multivariate normal distribution 1277
Multivariate survival data 813
Multiway 1241

Nearest neighbor 156

Negative binomial 224
Neural tube defect 1241
Nonadditive models 273
Noncentral hypergeometric distribution 268
Nonconstant variance 1277
Nonhomogenous Poisson process 904
Non-ignorable censoring 826
Non-ignorably missing 984
Noninformative prior 129
Nonlinear mixed model 1120
Nonlinear regression 37, 1277
Non-Markov model 1228
Nonparametric Bayesian inference 738
Nonparametric maximum likelihood 117
Nonparametric predictors 951
Nonparametric regression 1177
Nonparametric 769, 1085
Nonstationary Gibbs point processes 1051
Nonzero baseline model 308
Normal approximation 1114
Normal distribution 896
Normal mixture model 44
Nutritional epidemiology 711

Offspring estimation 321
One-sided test 190
One-way layout 1236
Optimal designs 1030
Optimal stopping 971
Ordinal data 308
Outliers 997
Ovarian cancer 858
Overdispersion 117,149, 774, 1263
Overlap effects 273

Panel data 915
Panic disorder 834
Parametric simulation 1281
Partial likelihood 284, 984, 1129, 1162
Peaks separation 37
Penalized generalized estimating equations 951
Penalized likelihood 887
Penalized quasi-likelihood 1022
Periodontal Research 302
Permutation test 732, 1156
Petersen estimator 1014
Phenotype models 891
Phenotype variance components 891
Phylogeny reconstruction 1
Point process 156
Poisson inverse Gaussian 224
Pooling 718
Population density 321
Population heterogeneity 997
Posterior distribution 1038
Posterior tail probabilities 727
Power exponential distribution 1277
Power 156, 289, 853
Precision of prevalence estimate 1137
Predictive value positive 867
Predictive value 944
Prevalence estimation 1137, 1145
Prevalence 867, 1252
Principal component 1210
